PERSONAL PROJECTS

Creating a Movie List Application in React (10/2022)
- Creating a Movies and TV Series App in React JS and Material UI with full responsive fuctionality. Where I use MovieDB API for backend .Link-> https://movie-app-ohhc-d5j8pdyyd-jyotimishra05.vercel.app/

Random Quote Generator App using Html /css/javascript (10/2022)
- In this quote app, each time you click on the new quote button you'll get a new quote. You can also convert a quote to speech, copy a quote, or share a quote on Twitter by clicking the given button.Link -> https://leafy-dasik-689531.netlify.app/.

Tip-calculator using html/css/javascript (09/2022)
- The objective of the project is to take the input value from an input field, then click on a "calculate" button. Once done,you will total amount including tip amount, which you can go through in my GitHub account. Link-> https://rainbow-donut-e6ba93.netlify.app/

Github User Data using React. (09/2022)
- Getting, Github Users Data using **useEffect Hook with Fetch API .**

Netflix Clone UI Using Html/css (07/2022)
- In this project, I have cloned Netflix UI using HTML and CSS. Project Link-> https://profound-sable-be4fbd.netlify.app/

Online Leave Management System using Html/css/javascript/Python/Django (02/2021 - 06/2021)
- I have worked on this as a part of a team for my final year project in which We have created a web app where we can apply leaves as a faculty, student and the proper authority can approve or reject it.
